ALLIGATOR - the fully automatic hydraulic expansion precision clamping system in the best GDS quality!

The ALLIGATOR series was specially developed by GDS for use in tool grinding machines and is an innovation in the field of hydraulic expansion precision clamping devices for tool grinding machines.

The outstanding damping properties of the ALLIGATOR series, in combination with its precise concentricity and repeatability, enable the production of the best surfaces.

Best geometries, consistent quality, shape and dimensional accuracy on the tool cutting edge are the result with GDS clamping devices from the ALLIGATOR series.

GDS - precision is our passion

Your flexible solution covering the clamping range 3-20 mm.

Your advantages:

- Low interference contours for optimum grinding wheel run-out
- Flexible clamping range due to commercially available intermediate sleeves
- Excellent concentricity and repeatability.
- Sustainable through inexpensive repairs and general overhauls
- Automatic loading of the workpieces
- Automatic bushing change possible

The new ALLIGATOR hydraulic expansion precision clamping system can be used in the following tool grinding machines:
